DATE

Note to Applicant: Please complete this title page and attach all grant application materials prior to submission.

One Page Project Summary

This grant request is for the replacement fo guzzler number 5 on Pinyon Ridge, approximately 11 miles north west of Wrightwood.

The existing guzzler has fallen into disrepair, and because of a very unusual design, and inability to access the tank, the guzzler cannot be put back into operation.

The replacement with a "Nevada Style" guzzler from the current style of guzzler, will allow the guzzler to be repaired and serviced easily. Also the life span of the guzzler will be significantly increased, providing water for the local wildlife for year to come.

Background on Applicant's Organization

Purpose and goals: Our goal is habitat improvement for all types of wildlife.

Brief summary of current activities: We are currently conducting monthly habitat workdays in the Angeles Forest.

Geographic area served: We install, repair, and check, guzzlers in the Angeles Forest, east of the 5 freeway, and west to the Los Angeles county line.

We sometimes also do habitat work in the Mojave Desert.

Grant Application  
Page 4

Major sources and dollar amounts of corporate, foundation and government support during current and past fiscal year: We installed 4 guzzlers in the Angeles Forest in 2010. We were able to do the 4 guzzler installations with help from a federal "Answer the Call" grant of \$11,000.

History of all grants received from the Los Angeles County Fish and Game Commission: Our records show that in the last 12 years we have received grants from the Los Angeles County Fish and Game Commission of \$6600 in 2007, and \$5500 in 2003.

Project Information

Statement of justification of need: Pinyon Ridge guzzler number 5 is now non-functioning because of it's design with the tank buried under the apron, making maintenance of the tank and clearing debris impossible without destroying the apron. To service the guzzler and clear debris you must destroy the apron, and possible the tanks to clear debris that is clogging the lines going to the drinker. This is the last guzzler of this type of Pinyon Ridge. A Nevada Style guzzler is easily serviced.

Statement of purpose and goals: To increase the ability for game to disperse with the addition of another guzzler. Also to provide another water source in drought years.

Action plan to meet objectives: We will remove the apron and replace the non-functioning guzzler with a Nevada Style that is more efficient. Installing a 880 gallon tank, with steel uprights and crossbeams, with enough strength to withstand snow conditions, and the occasional bear. The tank has a walk in ramp for small game. We will also install a valve with pipe leading to a stainless steel drinker for big game.

**Statement of how the objectives advance the propagation and protection of fish and wildlife:** The installation of a Nevada Style guzzler to replace guzzler number 5 on Pinyon Ridge, will provide water in drought years, and disperse wildlife in the area.

**Project budget and timetable:** A \$3000.00 grant will pay for most material for the installation of a guzzler to replace Pinyon Ridge number 5.

Additional costs, fuel, truck rental, equipment rental etc. will be paid by San Gabriel Valley Quail Unlimited. And of coarse all labor to remove the old guzzler, along with it's cement apron, as well as the installation of the new Nevada Style guzzler will be provided by San Gabriel Valley Quail Unlimited volunteers.

**Sources of other support for project:** San Gabriel Valley Quail Unlimited will pay for additional costs for the old guzzler removal and installation of the Nevada Style guzzler.

Current status of project: The existing guzzler is currently non functioning.

Cash flow analysis of the expenditure of project funds: See attached schedule "Prices  
for 1 guzzler"

Proposed method of evaluating results: We will take photographs of the old  
guzzler removal, as well as the  
installation of the new Nevada Style.  
We are also planning on purchasing a  
game camera to show wildlife use of  
the new guzzler.

Plans for funding on-going project (if applicable): Not Applicable

Progress reports (bi-yearly or upon completion, whichever occurs first): We will give a presentation on the guzzler project upon it's completion later this year. If road conditions allow.
